- Executive Summary
- Introduction
- Method ology
- Results
 - Visualization Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Web development languages are the most popular in use and will remain as such
- Al and Machine learning are driving trends language use
 - Python and SQL are growing in popularity.
 - Interpreted languages, easier to learn, are trending up
 - The most popular languages are all focused on manipulating data
- A noticable shift in databases away fromMySQL towards PostGres is developing
- NoSQL databases are trending
- Platform usage is dominated by web centered frameworks.

INTRODUCTION

- The most popular languages remain those focused on web development.
- A growing trend is a group of languages related to data and machine learning.
- Older compiled languages are continue to lose popularity
- Databases show a shift in the most popular open source database.
 - MySQL is dropping in popularity.
 - PostGres is replacing MySQL.
 - Microsoft SQL server remains the most used licensed database

METHODOLOGY

- Data was gathered from several websites and portals.
 - Job posting content was scraped from and IT job website.
 - Content was pulled from Portals.
 - APIs were used to collect survey data from a leading IT board.
- Once the data was collected, the data sets were explored and reviewed to decide how to proceed with normalization.
- The data was cleaned and prepared for analysis.
 - Duplicate rows and data sets were removed.
 - Missing values were dealt with.
 - Some data values were normalized or formatted for better analysis

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & **IMPLICATIONS**

Findings

- Javascript and HTML are the top languages for this year and next.
- Python will play a larger role next year
- SQL will remain in the top 5 languages

Implications

- Languages integral to the internet are popular and will remain so.
- The highest-ranking languages are interpreted rather than compiled.
- The Internet and AI drive the rankings

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & **IMPLICATIONS**

Findings

- Open source databases occupy most of the top slots
- MS SQL is losing popularity
- Mongo DB, a NoSQL database is expected to grow next year

Implications

- Open source databases are popular due to features and cost
- Databases from large corporations are dropping in popularity.
- NoSQL databases may take a larger role as AI develops

DASHBOARD TAB 3

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Languages for internet development dominate the most popular languages.
- Interpreted languages focused on AI and data science becoming popular.
- Open source databases are trending

Implications

- Web development dominates most development.
- Al activity is driving future trends in language use.
- Large companies are losing ground in their database usage reach.

CONCLUSION

- The most popular languages, platforms and databases change from year to year.
- Languages that focus on the web and Al hold the tops spots consistently.
- A shift in databases towards open source is visible in the data.
- The IDE platforms are trending towards Web and AI focused platforms.

APPENDIX
